

SAN ANDREAS SANITARY DISTRICT

Schedule of Fees and Charges

Effective as of July 1, 2017

Application Administration Fee – Ordinance Section 4.3 **\$500.00**

The Application Administration Fee is a nonrefundable fee to cover the District's cost of the initial review and processing of an application for connection to the District's Sewer System. District costs might include staff time to research existing EDU commitment for property, research delinquent fees and charges for property, gathering background information on project. Application Administration Fee might also include initial legal/engineering review of application. Application Administration Fee may be higher for large complex projects.

Connection Fee – Ordinance Section 4.6 **\$800.00**

The Connection Fee covers the District's cost of inspecting the actual connection of a new user, or expanded use, to the District's collection system. The Connection Fee for a 4 inch diameter connection is \$800. The Connection Fee for larger diameter connections is determined on a case by case situation taking into consideration the size of the connection and the complexity of the connection, e.g. is bypass pumping required, is reconstruction of manhole required, etc..

Capacity Charge – Ordinance Section 4.7 **Varies**

The Capacity Charge varies, depending on the type of use and the estimated wastewater flow the use will be discharging to the District's systems. The estimated wastewater flow is calculated using the unit flowrates shown in Table 1A of Ordinance No. 8, or estimated by other methods as allowed for in Section 4.7D of Ordinance No. 8. The Capacity Charge is determined by multiplying the estimated wastewater flow, in gallons per day, times the unit rate of \$46.83 per gallon per day. Twelve months after connection to the District's system, the Capacity Charge may be adjusted up or down, based upon the uses actual daily water consumption as provided for in Section 4.7E of Ordinance No. 8.

Sewer Extension Application Fee – Ordinance Section 10.2 **\$1,000.00**

The Sewer Extension Application Fee applies when an extension of the SASD collection system is required to service a new user (as opposed to a new user that can extend a service lateral to connect directly to an existing SASD Collection System line along the frontage of the new user's property). Similar to, but separate from the Application Administration Fee, the Sewer Extension Application Fee covers the District's initial cost to review and process an application to extend the District's collection system to service a new user.
