NOTICE OF PUBLIC HEARING

concerning

**RENEWAL OF WASTE DISCHARGE REQUIREMENTS
NPDES PERMIT NO. CA0079464
AND RESCISION OF TIME SCHEDULE ORDER R5-2014-0900-01
FOR
SAN ANDREAS SANITARY DISTRICT
WASTEWATER TREATMENT PLANT
CALAVERAS COUNTY**

San Andreas Sanitary District (hereinafter Discharger) is the owner and operator of the San Andreas Sanitary District Wastewater Treatment Plant (hereinafter Facility), a publicly owned treatment works located at 675 Gold Oak Road, San Andreas, California. The Facility provides sewerage service for portions of the town of San Andreas, serving a population of around 2200. Treated wastewater is stored on-site and is disposed via spray irrigation to land within the property boundaries of the Facility during the dry season. Due to insufficient storage capacity to contain all wastewater during the wet season, the Discharger is authorized to discharge up to 1.5 million gallons per day of treated effluent to the North Fork Calaveras River, a water of the United States, when 20:1 dilution (river water to effluent) is achieved.

The Facility is currently regulated by Waste Discharge Requirements Order (WDRs) R5-2014-0104-01, issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 8 August 2014 and amended on 19 August 2016. An Order is proposed to renew the NPDES permit/WDRs. The proposed Order includes revised effluent limitations for ammonia and cyanide based on the allowance of a mixing zone.

Time Schedule Order (TSO) R5-2014-0900-01 was issued by the Central Valley Water Board on 15 January 2014 and amended on 19 August 2016. The TSO contained a compliance schedule for cyanide. The proposed NPDES Permit contains effluent limitations for cyanide with which the Discharger can immediately comply. Therefore, the TSO is no longer necessary and is being rescinded.
