

SAN ANDREAS SANITARY DISTRICT

Wastewater Operations and Maintenance Recruitment

The San Andreas Sanitary District is accepting applications for Plant Operator.

Plant Operators perform a wide variety of physical and administrative tasks in the normal course of employment. Operators implement technical procedures for process control, work in hazardous environments that require wearing personal protective equipment (including respirators), operate heavy machinery, interface with the public and vendors in a respective manner, and work varying schedules. A full job description is available for all the knowledge, skills, and abilities required.

There is a wide salary range for Plant Operators, with starting wage at \$16/hr for Trainees and progressing to \$31/hr for Grade 3 Operators. All full time positions include medical benefits and PERS retirement.

While no previous experience is required for this recruitment, those with wastewater specific education, certification, and experience in the wastewater field will be given preference.

Minimum Pre-requisites to apply for this recruitment:

- High School diploma or equivalent
- Valid California Driver License

Applications are accepted and reviewed continuously. The first screening of applications will be October 12, 2018. Applications can be found at the website, <http://sasanitary.org/> and can be mailed to our office at PO Box 1630, San Andreas, CA 95249. Questions? If the website doesn't answer them, call our office at 754.3281.

After review of applications, the District will invite the most qualified candidates for an initial interview and written test. The test includes mathematics related to the wastewater profession and requires ability to read and write in English and clearly communicate answers in writing. The interview portion will include discussion with plant staff and involve walking around the industrial facility to see typical job assignments.

All offers of employment are contingent on a pre-employment physical exam.

Wastewater Operators are required to become certified to a Grade 2 level as established by the State of California Office of Operator Certification (waterboards.ca.gov) and certified as Collection System Operator Grade 1 as established by the California Water Environment Association (cwea.org) . Each of these organizations have websites that provide more information for those that are interested.
