

DEDICATION CEREMONY

On Thursday, October 8th, 2020, the San Andreas Sanitary District Board of Directors and staff will hold a dedication ceremony at TIME. The ceremony will be held on site at the wastewater treatment plant. The public is welcome to attend.

SPECIAL THANKS

SASD offers a special thanks to the following for keeping the project on track, time and budget!

Josh Weatherby

SASD’s Lead Operator who oversaw the Startup of new system

Denise Bettencourt

SASD’s Administration Lead for State Revolving Funds Disbursements

Jack Scroggs

Lead Consultant for Construction Management, KASL Engineers

WASTEWATER TREATMENT PLANT UPGRADE PROJECT 2020

WASTEWATER TREATMENT PLANT UPGRADE PROJECT 2020

In February 2019, the San Andreas Sanitary District (SASD/District) broke ground on a major upgrade to its wastewater treatment plant (WWTP). The project was completed in June 2020 after 15 months of construction. The \$6.5 million dollar upgrade was funded through a grant from State Revolving Fund and U.S. Department of Agriculture.

One of the most notable upgrades was replacing the 60-year-old antiquated aerobic digester with a new aerobic digester structure. This included air diffusers, a mixer and control equipment. The WWTP also received a new blower building and equipment. Additional improvements included:

- Solids handling pump facilities
 - Electrical system
 - Supervisory Control and Data Acquisition (SCADA) System
 - Site grading and pavement
 - Storage pond improvements (Pond D completed in 2018 as part of the project)

Besides providing significant operational improvements, the upgrades allow SASD to be a better neighbor by reducing the amount of unwanted insect and rodent attraction and unpleasant odors.
